 **Meeting ID:** 853 1226 2129

About the Speaker & Talk

Dr. Heather Patisaul is a Senior Investigator and the Scientific Director of the Division of Translational Toxicology at the NIEHS. She is a leader in the field of neuroendocrine disruption, has an h-index of 63, and has over 12,000 total citations of her 110+ peer-reviewed publications. Dr. Patisaul researches the mechanisms of how chemical pollutants disrupt neurodevelopment, and how neuroendocrine disruption differs between the sexes. Prior to joining the NIEHS, Dr. Patisaul served as Associate Dean for Research in the College of Sciences at North Carolina State University.

 **All are welcome — we hope you can join us!**
